The best avian pilot program in Mexico the most important of the pilots working for Aerolink the best installations and simulators of flight our program of commercial avian pilot of Linea (pcla) is designed to provide our students the necessary training to graduate with the proper course to work in à introductory course in the glass cabin jet trainer boeing 737 ng or airbus a320, through which the student will know the most modern navigation systems in commercial aircraft, professionalization seminar (before Acadá@mica level), with additional materials fundamental for the pilot. During the technological phase we receive high-level lecturers who complement the daily classes. Each group is invited by airbus to visit its training center and flight simulators of a320, the most modern in the world. Students have access to the best synthetic trainers for the flight simulation, starting with the redbird fmx of movement and with a 180-degree display, following with equipment with certificate advanced aviation training device (aadt) for flight by instruments and ending with Boeing 737 ng or Airbus A320 glass cabin simulators.During the actual flight phase, our students have different types of aircraft.XMF dribitluM CFP)RFI(II TAC CFP)oleuverP(XMF dribdeR rodalumiS ogoL noc nÂtelM neseppelj satraC a n'AiccdurtInI ed launaM)neseppelj(laicremOC otolIP ed orbiL sarboinaM ed launaM oleuV ed aroc;ÂtiB lausiV n'Aicagevan ed atraC)neseppelj(odavirP otoliP ed orbiL ocitc;Âdid lairetaM ocid©AmoreA aer©AA dadirugeS aer©Âa n'Aicamrofni ed selaunaM ulatsirc al a n'AiccdurtInI acitÁ saer©Âa saserpme ed n'AicartsinmdA selanoicida sairetaM neseppelj PTA s©ÂlgnI ne senoicacinumocelE II sactiu;ÂnoreA senoicarepO II n'AicagevaN II aÂgoloroeteM ocinc©ÂT s©ÂlgnI)RALA/TIFC(sonamuH serotcaF II oer©AA ohcereD II oer©AA otisnjÂrT ed lortnoC II serotoM y sevaporeA I acim;ÂnidoreA acis;ÂB aÂroeT soidutsE ed nalP .Cafa al ed aicnecl us ed n'Aicnetbo al arap otisiuger .rodaivA otoliP omoc lanoiseforp alud©Ac y olutÁt ed n'Aicnetbo ed osecorp le ne orenid y opmeit odnarroha ,aleucsE al ne etnematerid lanoiseforp nemaxe us razilaer sommula sol a etimrep euq ol ,acilibAP n'AicacuDE ed aRaterceS al ed soidutsE ed laicifO zedilav ed ortsiqeR le noc somatnoc etnemlanoicidÁ .aretrac al ed soidutse sol necoocer es euq ol noc)liviC n'AicavÁ ed laredeF aicneyA(Cafa al rop odidepxe .90-L otnemianoicuf ed osimrep le noc atneuc aleucsE al n'Aiccurtsni ed evanorea al ed etnapuco ocinÁ le odneis , amargorp le etnarud olos oleuv ed saroh 05 ed sam ralov arap sotsupsid nos sommula sortseuN ,ocix©AM ne ednarq sam atol al noc somatnoc .0001 y 005 nimraC latsirc ed sanibac noc sodapiuge y sotsupmoc selairetam noc acirbaI n'Aicareneg amitÁ ed dnomaid Y Ain't it? ###

The entry requirements for the course of the Private Pilot License – PPL (A) are as follows: To be at least 16 years old You must be at least 16 years old (the license can be issued at the age of 17). Be at least the medical holder of Class 2. You need to be physically fit to fly recreationally (Poseer Medical Certificate of Class 2) Pilot. Be competent in the English language. During PPL (A) training you get ICAO English Language Proficiency and you must have a minimum level of 4.To have sufficient knowledge of Mathematics and Physics. You must be able to perform some basic mental calculations and have a minimum of knowledge in Mathematics and Physics, no title or scholarship is required, but the Academy will perform an evaluation. What can I do with my private pilot license – PPL (A)? Fly non-commercial flights with passengers. When you successfully complete your PPL (A) training, you get your private driver's license and with it a land rating called SEP (One Engine Piston). Make flights in single-engine combat aircraft operating from ground airfields. After completing the PPL training, it is also possible to obtain the Night Classification in the Night Rating article to be able to perform overnight flights, under VFR (Visual Flight Rules) How can I get my private pilot license - PPL (A)? Step 1: Complete theoretical training The theoretical preparation harmonizes the bases for practical flight training. According to the EASA curriculum, theoretical preparation consists of 100 hours, of which at least 35 hours will be with an instructor in a classroom. During flights with a flight instructor, you will get all the skills you need to operate safely a plane at all stages of a flight and act as a pilot in command.20 hours of solo flights: The hours alone include local flights on your own and solo sailing flights under the supervising of the flight instructor on the ground (one of them is a 270 km/150 NM flight that is not required for you). The practical exam is performed under the supervision of an CAA-authorised examiner. You will have to demonstrate your ability to:Operate the plane within your limitations.Complete all maneuvers with precision and without problems.Exercise good judgment and aircraft.Apply the aeronautical knowledge. Maintain control of the aircraft.How much does the course cost to obtain the private pilot licence ? the course price starts from 7753 EUR.
